

Biometric suitable Photos

High-quality photos form the basis for the perfect reproduction of the image and are a precondition for the application of facial biometrics in ID documents.

Biometric suitable photos must have the following characteristics:

1. The size of the photo must be at least 35 x 45 mm. If the photo is larger than that it can be cut to size here.
2. The photo must clearly show the person's facial features. From the tip of the chin to the hair line the face must be between 32 and 36mm. The face must be centred in the photo
3. The head of the person photographed should be neither at an angle nor turned (portrait style). The person's expression should be neutral with the mouth closed and looking directly into the camera. Do not smile.
4. The person in the photo must look directly into the camera. The eyes must be open and clearly visible and may not be covered by hair or spectacle frames. The eyes must be clearly recognisable (reflections from glasses, tinted glasses or sunglasses are not permitted. The edge of glasses or the frame may not cover the eyes.
5. The face must be evenly illuminated. Reflections or shadows on the face as well as red eyes must be avoided

The following photo shops closeby have said they can take photos according to the above mentioned preconditions of the German Consulate.
